

Preventive Health Assessment (PHA) Fleet Implementation Tool
First Edition, December 2003, product of the Fleet Health Promotion Consortium,
or FHPC, Hampton Roads, Virginia.

Purpose: To meet the needs of shipboard medical personnel in implementation of OPNAVINST 6120.3, Preventive Health Assessment, commonly known as the annual PHA requirement. The content of this CD is purposefully *non-interactive*, recognizing that some ships often do not have maximum Internet capabilities. All content was retrieved from Internet Sources; then consolidated and reviewed by Subject Matter Experts. Content was primarily obtained from public domain websites of the U.S. Department of Health and Human Services. Concerted effort was given to avoid any infringement of copyright restrictions, and permission was granted to use documents not within the public domain. The Fleet Health Promotion Consortium welcomes your feedback, for quality improvement and customer satisfaction.
